ABOUT SHAMWARI GAME RESERVE

AFRICA

Shamwari Game Reserve

Shamwari, meaning 'my friend' in Shona, is the pinnacle of game reserves stretching 25,000 hectares over a malaria free landscape, it offers an award-winning nature experience and is one of the largest private conservation initiatives in Southern Africa.

Located in the Eastern Cape Province of South Africa, an area which is unmatched in Southern Africa in terms of its biodiversity covering 5 bio geographic regions of the 7 found worldwide, from the semi-desert Karoo in the interior to the lush green forests of the Garden Route.

Shamwari has a dedicated wildlife and conservation department with a wildlife veterinarian and ecologists who run the wildlife breeding, animal rehabilitation and rhino awareness centre, they also operate an anti-poaching unit and animal hospital. Offering the 'Big 5' it also hosts the Born Free Foundation Big Cat Sanctuary for rescued lions and leopards.

Project Overview

The Shamwari Group Conservation Experience is a once in a lifetime chance to get behind the scenes and involved with the conservation efforts of the world renowned Shamwari Game Reserve. The programme is a tailor made experience operating over a two week period, we work with you to put together the best possible programme in order to suit the needs and requirements of your group.

Shamwari boasts a multi-purpose centre geared to get participants involved in various components of conservation. The experience is a true reflection of the day to day operational requirements needed to manage the game reserve.

The project specialises in conservation, with a focus on ecology, wildlife, and environmental education with local community and sporting interactions as part of our social responsibility drive. Shamwari is situated in a malaria free zone and is one hour away from the closest major airport, medical facilities and other amenities in Port Elizabeth.

Your Conservation Programme

Whilst on your placement you will become members of the conservation department and will therefore work with the wildlife's best interests in mind at all times. Details of possible conservation, research and veterinary based activities are detailed below, we will use these to build your tailor made experience and ensure that all activities chosen by your group will be covered over the two week period.
