

Individual participant health & safety information – KwaZulu-Natal Conservation Research Programme

Welcome to your 'Health & Safety' information pack for your upcoming programme with us. While we are excited about your travels and we realise that you may have travelled with us before, we do hope that you will refresh yourself on the potential risks and hazards which you may encounter on your adventures. We are in regular contact with our project providers and as such, although the documentation included has been approved by ourselves and our providers, these documents are dynamic and can and will likely change so please pay particular attention to any updates before you travel. We also ask, as would be expected to follow the protocols and instructions of your programme provider when you are on our programmes.

We wish you a happy, fun and amazing adventure but keep safe! Thanks, The Gap Africa team.
