In the center is a dark, circular inset showing a snow-capped mountain range under a cloudy sky. USEFUL INFORMATION

Health Risks

Immunisation:

Contact your GP around 8 weeks before your trip to check whether you need any vaccinations or other preventive measures. The following website offers up to date information for travellers to Costa Rica

<https://travelhealthpro.org.uk/country/58/costa-rica>

Drinking water:

Tap water in Costa Rica is drinkable and in many areas of the country quite good. However, if you have a sensitive stomach it is recommended to drink bottled water when in beach locations. Please bring a water bottle, dissolvable sterilising tablets and Imodium.

Stay safe overseas – KBYG

The better prepared you are when you travel abroad the safer you will be. The Foreign, Commonwealth & Development Office offers 'Know before you go' travel advice, including simple precautions you can take before and during your trip.

To find out more, check out their website:

<https://www.gov.uk/browse/abroad/travel-abroad>

Malaria & Dengue:

There is a low risk of malaria in Costa Rica. Since 2013 there has been a sharp rise in cases of Dengue and cases of Chikungunya virus have been confirmed; you should take steps to avoid being bitten by mosquitos by using repellent and wearing long sleeves etc.

Medical care in Costa Rica is of a high standard. Only emergency medical treatment is available without charge for visitors so please ensure you have adequate travel health insurance to cover medical treatment abroad and repatriation.

<https://www.gov.uk/foreign-travel-advice/costa-rica/health>

Sun:

Costa Rica has a warm sunny climate, you should wear sunscreen and a hat whenever you are out of doors during the day, particularly between 10am and 4pm – regardless of whether there is cloud cover or not. Even if you have a dark complexion, you can still get sunburned if you are from a cooler climate and have not had much exposure to the sun. Sunglasses are also recommended, as the glare of the sun can be very strong.

USEFUL INFORMATION

Mosquito / Insect Bites

Accept the fact that you will get bitten!

However, try to prevent this as much as possible by covering up.

Wear long trousers, sleeves and use an effective repellent (natural or DEET based).

You are **instructed** to use natural/citronella/eucalyptus based repellent at the Turtle Project. You **cannot** wear DEET repellent 4 hours before working with turtles.

You can use DEET when NOT at the Turtle Project.

If you use DEET on your hands, remember not to put your hands in your mouth/eyes and keep away from all equipment.

Remember do not apply any insect repellent when you may come in contact with adult turtles or hatchlings during night patrols and hatchery duty, due to contamination.

USEFUL INFORMATION

Climate

Costa Rica's northernmost regions tend to be flat and arid and have dry tropical forest, while increased humidity and precipitation creates lush jungles in the south. The country's rainiest months, termed the "green season," start in May and run until early December. The dry season typically lasts from December through April.

Be prepared for rain and lower temperatures during the winter season (June–November), especially in Costa Rica's central valley.

In Costa Rica, the average annual temperature is around 21°C – 27 °C, the coolest months of the year are November, December and January. The months March through May are the hottest months of the year, so make sure you protect yourself from the sun.
