PROJECT PRESENTATION 7

What is a Game Reserve?

- A game reserve is a large area of protected land where wild animals can live safely
- Wildlife is free roaming throughout the reserve allowing them to thrive in their natural habitat
- Reserves are either Government Owned (National Parks) or Privately Owned/Managed
- Most reserves will have physical boundaries i.e. electrified fence line
- Due to physical boundaries, wildlife must be managed due to restraints on population growth, migration and resources
- Wildlife is protected but also utilised as a tourist attraction (Eco Tourism) which creates funding for conservation efforts and research

A large kudu antelope with long, spiraling horns is the central focus of the image. It is shown in profile, facing left, with its head and neck in the foreground. The background is a lush savanna with green trees and grass. The image is overlaid with a semi-transparent circular graphic on the left side, which contains the text 'AFRICA' and the project title. The overall scene is bright and natural, suggesting a healthy ecosystem.

ACCOMODATION & LIFESTYLE

Living in the African Bush

ACCOMMODATION & LIFESTYLE

AFRICA

SwebeSwebe – Hanover Nature Reserve Accommodation

Students and academic groups will be accommodated at our purpose-built camp on Hanover Nature Reserve, designed to provide comfort and foster community living.

The camp features shared twin and triple rooms with communal ablution facilities. At the heart of the camp is a spacious communal area, equipped with a shared kitchen and dining space, which also serves as a hub for relaxation, lectures and group activities.

For evening gatherings, there is a cozy firepit/boma area where students can unwind and cook meals over the fire under the stars. On weekends, groups are welcome to enjoy the main farmhouse and pool area.

Hanover Nature Reserve Accommodation

Welgevonden Accommodation

The student centre and camp is based on the reserve and boasts ten tents that sleep two people per tent in single beds, each tent also has lighting and electricity supply.

There are communal hot and cold showers and regular flushing toilets. The communal facilities include a lecture room, canteen, lounge, entertainment area and storage fridge.

The centre also has access to Wi-Fi and the camp is fenced off inside the boundaries of the reserve. Most evenings are spent at leisure around the camp.

Food at the Project

Ingredients for three meals a day are provided, on a self cook basis. Students will take part in communal cooking and keeping the kitchen tidy. This creates a vibrant and social camp atmosphere.

All meals are provided in the communal dining room; there is an outside area for dining as well.

Meals will either be served at the facility or in the field 'picnic' style, this depends on activities either planned or unscheduled.

Dietary Requirements

Provision can be made for Vegetarian & Vegan diets and for those who have a medical condition such as Coeliac disease that requires a Gluten Free Diet and for those with severe allergies to dairy, eggs or nuts.

Sustainability & Social, Economic Responsibility

Local employment from rural communities – our project partners employ a high percentage of staff from local communities. They advocate training to advance careers in hospitality, wildlife and conservation.

Low environmental impact camps – our project bush camps are built with minimal impact on the environment. Resources from the surrounding area are utilised for buildings, water is (where possible) pumped from local river sources and green energy supplies, such as solar are championed.

Community donations and support – we encourage all our international study groups to be proactive in donation collections and arrange for excess baggage for said donations to be taken out to South Africa in support of the local communities.

Move Africa, supporting young females – 3 in 10 girls in South Africa miss a week of school every month because they cannot afford basic sanitary products. Our project partners work with Move Africa alongside their partner NGOs, to distribute menstrual cups to the local communities and provide education workshops.

Rhino Art – Project rhino realises the enormous responsibility the youth have to ensure our wildlife is protected for many generations to come. They ensure they can reach and educate as many kids as possible through Rhino Art, using art workshops to teach about conservation. This initiative is supported by our local project partners.

Food/crop education – our project partners encourage food and crop education to rural communities, where cost of living to low income families and distance travelled to obtain basic resources can prove problematic. Projects include community allotments and providing education on best practice for crop rotations, harvest seasons and nutrition.

Recycling workshops – Litter, and in particular plastics, is a major issue and threat to the ecosystem in Southern Africa. Rural communities have limited waste removal available and it is therefore a problem escalating at an alarming rate. Recycling workshops are provided through local schools to help educate children on the importance of correctly disposing of litter and recycling plastics.
