

Hockey Coaching & Playing Project – Accra, Ghana

Project Overview

Hockey is a rapidly growing sport in Ghana, attracting enthusiastic school teams and clubs, yet opportunities for young players remain limited, and this placement allows volunteers to make a real difference. Based in Accra, you'll work alongside local hockey clubs and head coaches to introduce the game, run grassroots training sessions, and help improve skills across a variety of ages and abilities. Volunteers will also organise small tournaments and outreach programmes in local schools, giving children the chance to experience structured hockey, develop teamwork, and enjoy sport in a fun, supportive environment. The advantage of coaching a developing sport is that the children are so grateful for the time you spend with them and, although you may lack confidence to begin with, you will soon realise that you can offer something of great value.
