

Netball Coaching & Playing Project – Port Elizabeth, South Africa

Project Overview

Netball is rapidly growing in South Africa, especially among girls in the townships, but opportunities to play in structured teams are limited due to a lack of facilities, equipment, and trained coaches. By joining this volunteer netball coaching project, you will give young athletes the chance to play, develop, and enjoy netball in a fun and supportive environment. The focus of your placement is on building friendships and giving children from disadvantaged backgrounds the chance to enjoy the sport. You will be based in schools and townships around Port Elizabeth, helping to organise training clinics, matches, and local tournaments, while providing much-needed equipment. As a coach, you will run and supervise all sessions, introducing key skills such as passing, shooting, position holding, movement, and teamwork, while also having the freedom to create your own coaching programme. Your guidance will have an immediate and lasting impact, helping young players build confidence, improve their skills, and develop a real love for netball.
