

## Sports Physiotherapy Internship – Accra, Ghana

### Project Overview

The Sports Physiotherapy Internship in Accra offers physiotherapists a valuable opportunity to gain hands-on experience supporting athlete care, injury prevention and rehabilitation in a resource-limited environment. You'll work with local sports teams, academies and hospitals, providing physiotherapy support that is rare or unavailable in developing sports settings. You will be working in association with the Ghana Football Association (GFA), working as a full-time physio in one of the leading Premiership League football clubs. The GFA is under-funded and as a result, injury assessment, identification, and treatment of Ghana's top footballers is often neglected. Your experience and knowledge will be of huge benefit to the GFA, and you will feel a huge sense of achievement when leaving behind valuable treatment methods for teams and individuals you work with. This placement will strengthen your clinical skills, expand your understanding of global physiotherapy practice, and build real-world experience in preparation for your future career or academic goals.

*\*Must be at least second-year undergraduate level*
